# Umar Khan

As a software developer, I developed web applications. These solutions were consistently delivered to clients and drove their business success.

## ***Professional Synopsis:***

- A competent and result-oriented professional with over 3 years of experience in the areas of building web applications.

## ***Skills:***

- **Reactjs:** Utilized ReactJS to develop dynamic and responsive user interfaces, creating reusable components to enhance code efficiency and maintainability.
- **Javascript:** Experience in JavaScript for developing dynamic and interactive web applications. Proficient in modern JavaScript (ES6+) features, such as arrow functions, promises, and async/await, to write clean and efficient code.
- **Express (Node):** Leveraged Node.js to develop efficient and scalable server-side applications, utilizing its event-driven, non-blocking I/O.
- **Docker:** Utilized Docker to containerize applications, ensuring consistency across development, testing, and production environments
- **CSS:** Flexbox to create dynamic layouts and enhance user experience.
- **MongoDB:** MongoDB to design and manage scalable, high-performance databases for web applications
- **SQL:** SQL for designing, querying, and managing relational databases

## ***Educational Qualification:***

- B.Tech in Computer Science(2016–2020) from Integral University
- 10 + 2 from City Montessori School
